Pinnacle Renewable Energy Inc.

are suitably designed to provide reasonable assurance that the requirements of SBP Standard 2: Verification of SBP-compliant Feedstock (Version 1.0, March 2015), SBP Standard 4: Chain of Custody (Version 1.0, March 2015), and SBP Standard 5: Collection and Communication of Data (Version 1.0, March 2015) (the Requirements) have been met, as of January 11, 2016. Management is responsible for ensuring the SBP processes meet the Requirements. Our responsibility is limited to expressing an opinion as to whether the Requirements were met, based on our assessment. The Sustainable Biomass Partnership framework of standards can be found at www.sustainablebiomasspartnership.org.

Our assessment was conducted in accordance with the ISO 17021 and ISO 17065 conformity standards, and accordingly, included examining, on a sample basis, evidence supporting management's assertion that the Requirements were met and performing such other procedures as we considered necessary in the circumstances. We planned and performed our work in order to obtain reasonable, rather than absolute, assurance with respect to the information examined. We believe our work provides a reasonable basis for our opinion. In our opinion, the SBP process was suitably designed to provide reasonable assurance that the Requirements were met, in all material respects, as of January 11, 2016.
